PROFESSIONAL SUMMARY

Senior Backend Engineer with 5+ years building distributed enterprise SaaS on Ruby on Rails, Sidekiq, Redis, and Kafka. Team lead for 4 engineers at DispatchTrack on AI-operable platform (MCP, domain agents, Jira-to-PR automation) and Rails 2 to Rails 8 migration, consolidating Delayed Job, Resque, and RabbitMQ into Sidekiq across ~80 background workloads. Experience across logistics, healthcare, fintech, and fleet platforms.

TECHNICAL SKILLS

Languages: Ruby, JavaScript, TypeScript, SQL
Backend: Ruby on Rails (2.x-8.x), REST APIs, Sidekiq Pro, Kafka, JWT, OAuth, AASM
AI Platform: LLM tool calling, MCP, agent workflows, domain playbooks, guardrail layering
Databases: PostgreSQL, MySQL, MongoDB, Redis, Cassandra
Cloud: AWS (EC2, S3), Docker, Kubernetes, Jenkins, CI/CD
Testing: RSpec, Vitest, Playwright, Jest
Observability: Sentry, New Relic, Grafana, SigNoz, pgHero
AI Dev Tools: Cursor, Claude Code, Codex, Antigravity

PROFESSIONAL EXPERIENCE

Software Engineer | DispatchTrack | Hyderabad | May 2024 - Present

Project: B2B & B2C Enterprise logistics SaaS

- Built AI-operable harness with AGENTS.md manifest, MCP integrations (Jira, Bitbucket, Confluence), governed tool-callable surfaces, and Explore-Planner-Generator-Evaluator agent layers.
- Automated Jira-to-merged-PR pipeline with RSpec, Vitest, Playwright validation, AI diff review, changelog/ADR, Overcommit hooks, and Bitbucket CI.
- Rewrote Rails 2 monolith into Rails 8, migrating 50+ controller surfaces into domain-driven modules with parallel-stack coexistence during live cutover.
- Consolidated Delayed Job, Resque, and RabbitMQ into Sidekiq Pro across ~80 workloads; 3-tier queue isolation (realtime / imports / background), cache twin invalidation, and JWT routing APIs; building event-driven automation on Kafka.
- Lead a team of 4 engineers; own sprint planning, backlog prioritization, and agile delivery for migration and platform engineering work.

Software Engineer III | Sysvine Technologies | Chennai | Nov 2023 - May 2024

Project: Thoroughcare (Healthcare care coordination)

- Engineered Rails 6.1 + PostgreSQL backend for care-coordination workflows; designed Sidekiq async pipelines to decouple long-running clinical operations from synchronous request paths under peak load.
- Tuned PostgreSQL performance with pgHero and production observability (Sentry, New Relic, Grafana) on Aptible-hosted infrastructure.

Software Engineer | Presto Apps | Bengaluru | Feb 2023 - Oct 2023

Projects: Presto Web App (Marketplace SaaS), Presto Finance (Fintech)

- Designed Rails 6 multi-tenant SaaS backend with MongoDB, REST APIs, and idempotent webhook handlers syncing Zoho Books, CRM, and Inventory on AWS.
- Developed Rails 5 fintech APIs with JWT/OAuth and Smallcase Gateway; tuned MongoDB and MySQL query paths for transaction-heavy operations.

Senior Ruby on Rails Developer | Just Mind Work Pvt Ltd | Indore | Sep 2022 - Jan 2023

Projects: Upshift Cars, Fleetwaze, Budget Countertops

- Led backend delivery for Upshift Cars (Rails 6, PostgreSQL, Stripe, Chekr) and Fleetwaze truck logistics APIs (Rails 3.2) with Docker deployment.
- Designed stateful trip lifecycle workflows with AASM and Sidekiq for high-volume booking and status transitions.

Software Engineer | Veezolvia Technologies | Trichy | Sep 2020 - Aug 2022

Project: Growpath (Legal case management)

- Built Rails 5.1.7 + PostgreSQL backend for legal case management with filing workflows and third-party integrations (Documo, Nylas, mFax).
- Designed facade-based data access layers to optimize high-volume matter and document retrieval across complex schemas.

EDUCATION

B.E. Mechanical Engineering, Anna University, Chennai | 2013 - 2017 | CGPA: 8.83 / 10
