Profile summary

Senior Backend Engineer with over 5 years of experience building distributed enterprise SaaS using **Ruby on Rails**, **Sidekiq**, **Redis** and **Kafka**. Proven track record leading platform modernization and migrations, including a **Rails 2 to Rails 8** rewrite and consolidation of background job systems into **Sidekiq Pro** across ~80 workloads. Experienced in designing AI-operable platforms (**MCP**, agent workflows), building event-driven automation, and delivering scalable multi-tenant and fintech backends. Strong background in **PostgreSQL/MySQL** tuning, observability, **CI/CD**, **Docker** and **Kubernetes**, and mentoring small engineering teams.

Work Experience

Software Engineer – DispatchTrack India Pvt Ltd May 2024 - Present

Led platform engineering and Rails modernization efforts by rewriting a **Rails 2** monolith into **Rails 8** and migrating 50+ controller surfaces into domain-driven modules with parallel-stack coexistence during live cutover.

Consolidated Delayed Job, Resque, and RabbitMQ into **Sidekiq Pro** across ~80 background workloads, implemented 3-tier queue isolation (realtime / imports / background) and cache twin invalidation strategies.

Built AI-operable harness with **AGENTS.md** manifest and **MCP integrations** (Jira, Bitbucket, Confluence) and developed agent layers for Explore-Planner-Generator-Evaluator workflows.

Automated **Jira-to-merged-PR** pipeline with **RSpec**, **Vitest**, **Playwright** validations, AI diff review, changelog/ADR, Overcommit hooks, and **Bitbucket CI**.

Implemented event-driven automation using **Kafka** and JWT routing APIs.

Owned sprint planning, backlog prioritization, and agile delivery as team lead for a team of 4 engineers.

Software Engineer – Sysvine Technologies Nov 2023 - May 2024

Engineered **Rails 6.1** and **PostgreSQL** backend for care-coordination workflows in a healthcare platform, designing **Sidekiq** async pipelines to decouple long-running clinical operations from synchronous request paths.

Tuned **PostgreSQL** performance using **pgHero** and set up production observability with **Sentry**, **New Relic**, and **Grafana** on Aptible-hosted infrastructure.

Software Engineer – Presto Apps Feb 2023 - Oct 2023

Designed **Rails 6** multi-tenant SaaS backend with **MongoDB** and **REST APIs**, implementing idempotent webhook handlers to sync Zoho Books, CRM, and Inventory on **AWS**.

Developed **Rails 5** fintech APIs with **JWT/OAuth** and integrated Smallcase Gateway; tuned **MongoDB** and **MySQL** query paths for transaction-heavy operations.

Senior Ruby on Rails Developer – Just Mind Work Pvt Ltd Sep 2022 - Jan 2023

Led backend delivery for logistics and fleet projects (Upshift Cars, Fleetwaze), designing stateful trip lifecycle workflows with **AASM** and **Sidekiq** for high-volume booking and status transitions.

Integrated **Stripe** payments and third-party APIs and improved deployment reliability using **Docker**-based workflows.

Software Engineer – Veezolvian Communication Technologies Ltd Sep 2020 - Aug 2022

Built **Rails 5.1.7** and **PostgreSQL** backend for legal case management with filing workflows and third-party integrations (Documo, Nylas, mFax).

Designed facade-based data access layers to optimize high-volume matter and document retrieval across complex schemas and developed document processing and communication workflows.

Projects
AI-operable platform and Rails modernization
Built an AI-operable harness with AGENTS.md manifest, MCP integrations (Jira, Bitbucket, Confluence) and agent layers (Explore-Planner-Generator-Evaluator) to enable governed tool-callable surfaces.
Migrated a legacy Rails monolith (Rails 2) to Rails 8 , moving 50+ controller surfaces into domain-driven modules and enabling parallel-stack coexistence during live cutover.
Consolidated background job systems into Sidekiq Pro and implemented event-driven automation on Kafka .
Jira-to-merged-PR automation pipeline
Automated Jira-to-merged-PR pipeline with test validations (RSpec , Vitest , Playwright), AI diff review, changelog/ADR generation, Overcommit hooks, and Bitbucket CI to streamline developer workflows.
Multi-tenant SaaS and Fintech backends
Designed multi-tenant Rails backend with MongoDB , REST APIs , idempotent webhooks and integrations with Zoho Books, CRM, Inventory and Smallcase Gateway; implemented secure JWT/OAuth authentication and optimized DB queries for transaction-heavy operations.
Education
B.Tech / B.E. Mechanical Engineering 2017
Anna University Grade - 8.83/10
12th 2013
Tamil Nadu, English Marks - 87%
10th 2011
Tamil Nadu, English Marks - 83%
Extra-curricular activities
Technical Mentoring
Mentored junior engineers on Rails best practices, background job patterns, and migration strategies while leading small teams.
Achievements
Platform Migration & Consolidation
Led Rails modernization and consolidated multiple background job systems into Sidekiq Pro across dozens of workloads, improving reliability and maintainability.
Additional information
Hobbies: Technical Blogging, Open Source Contribution, Competitive Coding
Languages: English, Tamil, Telugu, Malayalam, Kannada
