PROFESSIONAL SUMMARY

Senior Backend Engineer with 5+ years on distributed enterprise SaaS (Rails, Sidekiq, Redis, Kafka). Team lead for 4 at DispatchTrack—owning Rails 2→8 modernization, Sidekiq consolidation (~80 workloads), and AI-assisted engineering platform (Jira-to-PR automation). Logistics, healthcare, fintech, and fleet.

TECHNICAL SKILLS

Languages: Ruby, JavaScript, TypeScript, SQL
Backend: Ruby on Rails (2.x-8.x), REST APIs, Sidekiq Pro, Kafka, JWT, OAuth, AASM
AI Platform: LLM tool calling, MCP integrations, agent workflows, governed SDLC automation
Databases: PostgreSQL, MySQL, MongoDB, Redis, Cassandra
Cloud: AWS (EC2, S3), Docker, Kubernetes, Jenkins, CI/CD
Testing: RSpec, Vitest, Playwright, Jest
Observability: Sentry, New Relic, Grafana, SigNoz, pgHero
AI Dev Tools: Cursor, Claude Code, Codex, Antigravity

PROFESSIONAL EXPERIENCE

Software Engineer | DispatchTrack | Hyderabad | May 2024 - Present

Project: B2B & B2C Enterprise logistics SaaS

- Built governed AI-assisted platform with LLM integrations (Jira, Bitbucket, Confluence)—automating ticket-to-code with test-gated, reviewable changes.
- Automated Jira-to-merged-PR with RSpec, Vitest, Playwright, AI diff review, and Bitbucket CI—reducing SDLC handoffs from ticket to release.
- Led Rails 2→8 migration of 50+ controllers into domain modules with parallel-stack live cutover—incremental rollout without big-bang downtime.
- Consolidated Delayed Job, Resque, and RabbitMQ into Sidekiq Pro (~80 workloads); 3-tier queue isolation and cache twin invalidation—improving async reliability; extending to Kafka.
- Lead team of 4; own sprint planning, backlog prioritization, and technical direction for platform modernization.

Software Engineer III | Sysvine Technologies | Chennai | Nov 2023 - May 2024

Project: Thoroughcare (Healthcare care coordination)

- Built Rails 6.1 + PostgreSQL care-coordination backend; Sidekiq pipelines isolate long clinical jobs from sync paths—keeping peak-load workflows responsive.
- Tuned PostgreSQL with pgHero and observability (Sentry, New Relic, Grafana) on Aptible—improving reliability under clinical peak load.

Software Engineer | Presto Apps | Bengaluru | Feb 2023 - Oct 2023

Projects: Presto Web App (Marketplace SaaS), Presto Finance (Fintech)

- Rails 6 multi-tenant SaaS with idempotent Zoho webhook sync (Books, CRM, Inventory) on AWS—consistent billing and inventory across tenants.
- Rails 5 fintech APIs (JWT/OAuth, Smallcase); tuned MongoDB/MySQL for transaction-heavy investment flows.

Senior Ruby on Rails Developer | Just Mind Work Pvt Ltd | Indore | Sep 2022 - Jan 2023

Projects: Upshift Cars, Fleetwaze, Budget Countertops

- Led backend for Upshift Cars (Rails 6, Stripe, Chekr) and Fleetwaze logistics APIs (Rails 3.2) with Docker—shipping rental and fleet booking to production.
- Designed AASM + Sidekiq trip lifecycle workflows for high-volume bookings—reliable concurrent state transitions under load.

Software Engineer | Veezolvian Technologies | Trichy | Sep 2020 - Aug 2022

Project: Growpath (Legal case management)

- Built Rails 5.1 legal case-management backend with filing workflows and integrations (Documo, Nylas, mFax)—supporting high-volume matter operations.
- Facade-based data access over complex schemas—faster matter and document retrieval for large caseloads.

EDUCATION

B.E. Mechanical Engineering, Anna University, Chennai | 2013 - 2017 | CGPA: 8.83 / 10
